

Higher Education Division

Heading To the Beach

Very soon, Galveston will be the center for art education discussion in the state of Texas. It should be a great time at the beach! This year's TAEA conference looks to be the biggest and best ever, and the Higher Education Division is again poised to add much conversation and involvement to this annual gathering. There will be a number of thoughtful and engaging sessions conducted by members of the Higher Education Division. Don't miss this opportunity to touch base and share ideas and conversation with other members of the higher education art education community in Texas!

Again this year, the higher education division will host a session at the conference that showcases recent research conducted by graduate students in various art education programs throughout the state. Given the quality of similar sessions conducted at the conference in the past, this will be a great opportunity to learn what research is being conducted by art education graduate students in the state of Texas.

Echoing this graduate research session, this year's conference will also include a session directed toward recent and current research carried out by art education faculty and other professionals throughout the state of Texas. This session will give attendees the opportunity to hear about and discuss the range of research and investigative activity being undertaken in art education.

Another session sponsored by the Division of Higher Education this year will be a collective series of short talks by representatives of the various university graduate programs in art education throughout the State of Texas. This session will provide opportunity for audience members to learn about the range of art education graduate programs in Texas and talk with representatives of these programs.

Involvement in the fall TAEA Conference by members of the Higher Education Division has increased greatly over the past few years; let's continue this active trend. I look forward to seeing you at the Beach!★
